$Q = Q_0 \cdot (1 + n)$

$Q_0 = \frac{Q}{1 + n}$

Q

$3,930,000 + 3,530,000$

$400,000$

$3,930,000 \cdot (1 + 1.2) = 8,646,000$

$3,530,000 \cdot (1 + 1.2) = 7,766,000 + 400,000$

$(1 + 1.2) = 880,000$

2

$P = P_0 - V = 91.95 - 0.3 = 91.65$

$P_0 = V + P$

P P₀ 1 n 91.65 1+1.2 41.66
